DIY Guide Connect to **eduroam** Wireless Network On Mac OS Reference Operating System: Mac OS X 10.6 – 10.8

Configuring MacBooks to Access Internet via "eduroam"

1. Select "eduroam" from the WiFi/AirPort menu in the menu bar.

2. Enter your SMU email address and password and click Join.

(îr	The Wi-Fi network "eduroam" requires WPA2 enterprise credentials.
	Mode: Automatic + Username: @smu.edu.sg Password: ••••••
	 Show password Remember this network
?	Cancel Join

Example:

Faculty/Staff:- username will be <u>xxxx@smu.edu.sg</u> Student:- username will be <u>xxxx@business.smu.edu.sg</u>, <u>xxxx@sis.smu.edu.sg</u>, <u>etc.</u>

3. Click **Continue** when the **Verify Certificate** pop-up window appears. Enter your computer's password when prompted.

(**Note**: If the pop-up window does not appear, but Wi-Fi successfully connects to "**eduroam**", you may already have the Certificate in your **Keychain Access**).

4. When a check icon appears next to the **eduroam** SSID, you would have successfully connected to the **eduroam** network.
